

Our Mission

We provide hands-on guidance and involvement as we help you apply the appropriate tools and techniques to **Failure Proof Your ProjectsSM** and **Accelerate Your Visions to RealitySM**.

The Principals

Dave Dirks

- PMP, Six Sigma Master Black Belt
- Executive Consultant, Xerox, Knowledge Document and Content Management
- VP IT/CIO, Environmental Testing Labs
- Other Experience: Technology Assessment, Planning, CIM, Manufacturing Management

Hal Lunka

- MSME, PMP, Six Sigma Green Belt
- Extensive experience in product development at many levels. Five patents.
- Experienced in entrepreneurial start ups.
- Past Chairman of the Board, Project Management Institute Mile Hi Chapter.
- Faculty member, Keller Graduate School of Business.

Our Process

We will work with you to assure:

- We and you understand the factors that are causing failure
- We and you understand the monetary and business impact of getting the work done right
- We and you have a clear articulation of your VISION

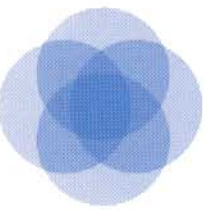

Once your VISION and the environment are understood, a team of your people will embark on an extensive planning process with our guidance. It will include:

- A clear strategy to improve achievement of goals and objectives
- Establishment of priorities
- Agreement on environment for efforts
- Development of plans to implement visions using appropriate tools.

The final phase is to "Make It Happen":

- Execute plans
- Measure Progress and Control Changes
- Hands on Coaching and Mentoring
- Report Progress
- Implement Continuous Improvement Process if needed

Our Vision

Success involves the use of many tools such as **Project Management, Portfolio Management, Six Sigma, and Management of Change** which by themselves are significant, but not sufficient. Individuals and organizations must move quickly and decisively in the modern competitive world. We will save you money and make your processes more effective.

...individual tools may be significant, but not sufficientSM

Failure proof your projectsSM

Doing the right projects, the right way...

Portfolio Management

- Maximize value
- The right balance
- Strategically aligned
- The right number

Six Sigma

- Data and fact driven decisions
- Disciplined process
- Dollars to the bottom line
- Voice of the customer

Project Management

- Predictable and consistent
- Control of Scope
- Benefits sooner and more reliably

Management of Change

- Facilitate emotional transition
- Facilitate physical change
- Release innovation

Tools to help you
grow your profits
